

# Deleting an observation or comment

It is not possible for relatives to delete or edit any observations from Tapestry, including the ones they have added, so, if you are a relative, please make sure you are happy with it before you post it.

If you do want to delete it after you have posted it, you will need to get in contact with your child's Setting directly.

You can however, delete a comment you have made on an observation. To do this you just need to press the red 'X' button in the top right hand corner of the appropriate comment.

## Playing the sand

### Notes

Today we built houses and wrote our names in the sandpit.
