

### English

This half term Year 2 will be creating non-fiction fact files about animals and their habitats. They will be creating brochures with designs for their own diorama using facts and information collected from texts and information we will learn during our Science lessons.

We will also be working hard to ensure the children reflect upon their year in Year 2 and can come up with some targets for how to move forward for their annual reports.

The children will also have an opportunity to write a letter to their new class teacher telling them all about their likes, dislikes and worries ready for the move to Year 3.

### Maths

This half term the children will be spending time on consolidation, we want to make sure the children are secure in the 4 basic operations ready for Year 3.

To help with this at home it would be useful to revise:

Addition

Subtraction

Multiplication

Division

As well as going over the 4 operations lots it is useful to keep up with daily telling the time, measurements and putting math into the real world!

### Music

In music this half term we will be inventing a melody, writing it down and playing it back. To do this we will select instruments with different timbres.

To finalise the unit, we will compose and perform a piece using different dynamic levels.

## Into the deep, dark woods! Year 2 Summer 2

### Science

This term the children are learning about animals and their habitats.

We will conduct some research into creatures in larger habitats and ask:

Why do these living things live there?

To demonstrate our understanding we will create dioramas of different habitats and label with research information.

### P.E.

In outdoor games, the children will be learning focussing on athletics. In our other PE lesson we will be learning to play badminton.

### PSHE/RE

#### **PSHE**

As a part of our JIGSAW scheme, the children will be discussing changes in their school and home lives, as well as their bodies as a part of our RSE education.

#### **RE**

In R.E. this half term we will be deepening our understanding of Judaism through research and understanding the symbolism of the Jewish faith.

### Design and Technology

The children will be collaborating with their peers to design and create their own bug hotels and decide where best to position them in the school grounds.

### Computing

The children will be consolidating their basic computer skills this half term. They will also be learning how data is collected, used and displayed and the scientific learning of the conditions needed for plants and humans, to survive.
